

THE STONE COIN buys 22 residential units in Germany

We were quite surprised of the great resonance THE STONE COIN received, and we are very satisfied with the results of our initial funding rounds. THE STONE COIN has not only reached its soft cap much earlier than originally expected, but also clearly outperformed. The token was received very well in the market. Accordingly, the development of the international real estate portfolio, THE STONE COIN's REAL SHIELD was prematurely started. The token thus has an intrinsic value.

The REAL SHIELD aims at the long-term existence of the company and thus also of the acceptance point network at the PoS for the payment token. To this end, the net capital raised by issuing THE STONE COIN will be fully invested in the development of a sustainable European real estate portfolio.

On July 10 came the starting signal: The STONE COIN AG has acquired 22 residential units on the Weisenburgerstrasse in Recklinghausen near

Dortmund (Germany) at excellent conditions. There are four apartment buildings with a total of twenty-two 3-room apartments. The buildings are massive brick buildings in good condition. The objects are located in a quiet and pleasant residential area. This ensures full letting of the properties even if the German rental market changes.

Currently, two more properties are being ne-

gotiated at locations in Germany, which could soon complement the portfolio. The website www.thestonecoin.com will provide timely information on the development of the real estate portfolio.

THE STONE COIN listed on four exchanges this year

Regarding stock exchange listing THE STONE COIN (STO) is clearly before the orig-

inal schedule, too. The international market requires a timely presence of THE STONE COIN

on several international crypto exchanges. Accordingly, STO will be traded on four inter-

national exchanges of different regional orientation already in 2019.

The first listing will be on the **22nd of July of 2019** on Bitinka, the leading South American crypto exchange. Coinmarketcap rates them with a 30-day trading volume of 3.5 billion Euros as number 52 of the world's crypto exchanges.

Bitinka is particularly present in the South American market. Most of the turnover generated by the NGO Portal REAL WORLD INSPIRE (www.realworldinspire.org), which has chosen THE STONE COIN as its key currency, will be carried out through Bitinka.

Trading starts at 4 pm CET (10 am in Peru) at www.bitinka.com

Due to the great reception of THE STONE COIN and its project's business model in Asia (most recently at the BLOCKSHOW ASIA 2018 in Singapore and the SUMMIT RISE 2019 in Hong Kong), trading of STO starts at the LIVECOIN.NET Exchange on the **15th of August of 2019**.

At the **beginning of September**, EXMARKETS will follow as the third exchange and - with its main focus on the European market- will so complete our global trading portfolio further. In the beginning the trading pairs STO/BTC, STO/ETH, STO/USD and STO/EUR will be traded.

LATOKEN will follow on the **22nd of September of 2019** as the final and biggest exchange for STO in 2019. This crypto exchange serves CIS / Russia in particular and its services are available in Chinese as well. With a 30-day trading volume of more than 25 billion Euros, LATOKEN is the number 16 among the international crypto exchanges.

The independent donation portal is live - with THE STONE COIN as its key currency

The independent NGO donation portal REAL WORLD INSPIRE (www.realworldinspire.org) went live on July the 8th of 2019. At the

start, there were already 15 organizations committed to have their projects displayed on the portal. The Peruvian organization Mundo

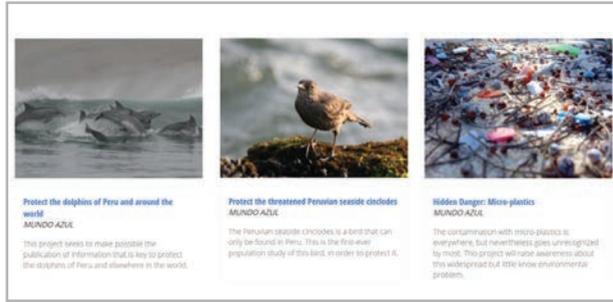

Azul, for example, has already listed three projects to protect dolphins in Peru, for marine environmental research and to fight against mi-

cro-plastics in the oceanic food chain.

The portal has chosen THE STONE COIN as its key currency.

So no matter in which FIAT or crypto currency a donation is made, it will be swapped to THE STONE COIN and transferred to the organizations almost everywhere in the world.

What is the advantage for the NGO to get their donations in THE STONE COIN? Basically, THE STONE COIN as the portals key currency solves one of the biggest problems of small and medium NGOs, which is only receiving part of the donated money. By not using middlemen and through transferring the money by THE STONE COIN, the local charities receive around 95% of the originally donated money - instead of a mere 50% as of today.

The funds are frozen for 90 days, and then the recipients can exchange it locally into their local currencies. THE STONE COIN will receive big and very positive attention, gets known by lots of people inside and outside the crypto community and will be in high demand once the portal starts growing.

The presence of THE STONE COIN as the key currency on the NGO portal will also

have a very positive effect on the development of the market price of the STO. Donors acquire STO and donate it on the NGO portal directly to the organization of their choice. The NGOs receive the STO volume of their donation account after 90 days and then sell THE STONE COIN on crypto exchanges when needed. This means that STO demand always precedes supply (excess demand). The inclusion of further projects on

the NGO portal means that the demand for STO increases significantly over time and thus goes on exceeding the sales volume by the NGOs. Both mechanisms lead to a strong increase in the STO presence on the NGO portal. This naturally has a positive influence on the development of the STO's market price. From previous discussions it appears that even the NGOs will keep part of their STO to benefit from a rising STO value as well. This additionally fuels the price increase effect.

Proper mobile wallet for THE STONE COIN will be available at the end of July

As of July 31st, the Android version of THE STONE COIN's own mobile wallet will be ready. Shortly thereafter, the iPhone version will be launched, too. The app has been designed to be safe and easy to use. With the app, paying at POS

systems at the POS is child's play. The app is compatible with the common cash register cashless payment systems.

The exciting thing is that the wallet can import THE STONE COIN without incurring any

fees. And at the point of sale transactions, no ETH is needed; the fees for use are calculated in STO. With the mobile wallet one can pay directly at all participating acceptance points with THE STONE COIN. The construction of the acceptance point

system is currently in full swing. Here, THE STONE COIN also cooperates with several partners who are already successfully operating acceptance point systems.

THE STONE COIN as Exhibitor at the RISE 2019 Summit in Hongkong

After the BLOCKSHOW Asia in Singapore, the Malta AI & BLOCKCHAIN SUMMIT, Money 20/20 EUROPE in Amsterdam, the OpenExpo Europe in Madrid and the CIBTC Granada fairs, THE STONE COIN successfully featured in RISE Summit 2019, Asia's largest Tech Conference with over 16,000 vis-

itors from all over the world last week.

The team led by Rolf

Jeker, the Chairman of THE STONE COIN AG, held numerous investor talks at the RISE Summit 2019 from the 08th to the 11th of July and during the evening events. The concept of THE STONE COIN was well received by press and influencers. Several journalists conducted interviews with the STO team. Many experts at

RISE were particularly enthusiastic about the key currency function of THE STONE COIN on the NGO portal REAL WORLD INSPIRE (www.realworldinspire.org). In this they saw in unison a decisive leverage for long-term price development.

25% Special Discount (only until the 21st of July 2019)

We want to celebrate and share our successes and offer all readers of TSC-News an exclusive and one time discount of 25% until July 21, 2019, on the purchase of THE STONE COIN (STO) on the ICO portal thestonecoin.tokengate.io.
