

## NGO Krypto Charity Portal ‘Real World Inspire’

At the initiative of the well-known environmentalist and journalist Stefan Austermühle (long-time Greenpeace employee, founder and director of the Peruvian environmental organization Mundo Azul), the independent NGO crypto charity portal Real World Inspire will start at the end of May of 2019 with the support of various cryptographic companies. On this donation portal, non-profit organizations from all over the world can register for free, promote their projects and collect funds directly. Donations can be made in the payment token THE STONE COIN as the key currency of the donation portal. This means that the NGOs receive all donation credits on their project accounts in the secure crypto currency THE STONE COIN. Donations in other currencies will be exchanged by a partnering crypto exchanger to THE STONE COIN.

“Real World Inspire is initiating a worldwide fundraising revolution,” Austermühle announc-

es, explaining: “Until now, small non-profit associations in developing countries have been dependent on the

project decisions of their international partner organizations. Complex financial flows via middle men (NGOs, commercial crowdfunding platforms) and high commissions for money transfers meant that often 20-50% of the donations did not reach the project. With Real World Inspire, that’s a thing of the past.”

The registration to the non-profit NGO crypto charity portal is completely free for both donors and NGOs. Local NGOs with local projects thus have the opportunity to attract inter-

ested parties worldwide without having to invest in advertising or using middlemen. The donation portal can therefore

be used to reach a much broader target group. At the same time, 95% of the donations are made available for the local projects; another 3% goes into the publication of the projects. Only 2% of the donations will

be needed for the operation of the non-profit donation portal. “This is the world record in donation efficiency” says Austermühle. Especially with donations for international projects, the NGO portal Real World Inspire completely avoids the high transfer costs of the traditional banking system. The portal provides donors with an overview of various international aid and environmental projects. On this basis those donors can specifically support the projects of their choice. The donation portal starts in June with the projects of more than 20 Peruvian associations in the test phase and will open this year for organisations from around the world.

## Construction of the real estate portfolio starts

The basic idea of THE STONE COIN is to combine the flexibility of a cryptocurrency with the security of a European real estate portfolio, true to the motto "BEST OF BOTH WORLDS". The net funds raised by the emission will be invested in the development and continued operation of a substantial European real estate portfolio. As a result, THE STONE COIN has an effective REAL SHIELD that permanently ensures the existence of the compa-

ny, of the token system and of the network of acceptance points. The net earnings from the real estate investments will be completely retained and re-invested in the preservation and expansion of the REAL SHIELD and thus in securing the token system. The Pan-European orientation of the real estate portfolio is primarily aimed at reducing risk by decoupling from regional price developments in the real estate markets. In Switzerland, for example, a decline

in property prices and rental rates is currently being observed at many locations. By no later than July 2019, THE STONE COIN AG plans to start building the real estate portfolio - earlier than originally planned - by acquiring properties in Bremerhaven (Germany).

## Environmentally friendly pre-mining

THE STONE COIN completely avoids the enormous energy expenditure associated with decentralized mining (such as for Bitcoin) and the associated environmental impact. The tokens were pre-mined by central production with almost no energy spent. At the same time, this offers the advantage that the proceeds will not go to many independent miners but will be directed into the REAL SHIELD.

## First payment token of the D-A-CH-region

THE STONE COIN is the first payment token in the D-A-C-H-region with a real estate-based protective shield and official approval from

issued, traded and used as a means of payment without any special restrictions.

THE STONE COIN is a pure, blockchain-based ERC20 payment token. ERC20 stands for Ethereum Request for Comments Nr. 20.

THE STONE COIN AG which issues THE STONE COIN and which is based in Triesen (Liechtenstein) is a 100% subsidiary of the Limmatier Invest AG based in Baar (Switzerland).

the Financial Market Authority. THE STONE COIN (ERC20) is neither a security token nor an asset (backed) token. The token can thus be

## New target groups for cryptocurrencies

Unlike the tokens of the first and second generation, THE STONE COIN not only addresses the typical crypto community, but also succeeds in inspiring conventional - until now only little crypto-oriented - target groups. This

is primarily due to the four core advantages of the payment token THE STONE COIN: Speculation Options, Acceptance Point System, Solidity & Seriousness and the permanent protection by the REAL SHIELD.

## CRYPSTONIZATION of PERU & MEXICO

While on a global level the number of crypto currency acceptance points grew merely 1.7% during March 2019, the number of Peruvian businesses accepting virtual money rose by 27.5 percent. More important we see the offer of direct crypto businesses more than double. March 2019 appears to have become a launching moment within the crypto history of Peru. Peru is beginning

to awaken and to integrate with greater effort into the global crypto sector. This growth is also driven by the launch of the Peruvian company “Mundo Real Inversiones S.A.C.”, which represents several international cryptographic companies and promotes in Peru as its first product the cryptocurrency THE

STONE COIN (STO). It is becoming apparent that Peruvian forex bureaus will be exchanging THE STONE COIN (STO) in the near future. THE STONE COIN was presented to Peruvian public and business world in events orga-

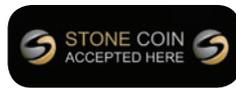

nized by the Chamber of Commerce of Lima, the Swiss Chamber of Commerce in Peru and the National Chamber of Tourism. Accordingly, a significant number of acceptance points have already been qualified for the THE STONE COIN (STO).

We will report on the launch of THE CRYPSTONIZATION of Mexico in THE STONE COIN - News 6/2019.

## International acceptance system

THE STONE COIN brings the crypto currency to the point of sale (POS). Currently, in cooperation with specialized service providers in the D-A-CH region (Germany-Austria-Switzerland) and in South America, a POS acceptance network is being set up for the payment token THE STONE COIN. A special STO payment app is available for this purpose. This allows owners of THE STONE COIN to easily and conveniently pay for shopping expenses, medical bills or other services via mobile app. In 2019, the acceptance system will first be

launched in Switzerland and Austria. There, 4,000 acceptance points have already been pre-qualified.

For the international market, THE STONE COIN AG is currently negotiating with several service providers. Those have international systems with more than 200,000 crypto acceptance points which THE STONE COIN (STO) may join in 2019. At the end of 2019, a large worldwide POS and online acceptance network will be available for THE STONE COIN.

## THE STONE COIN on the Tokengate portal

The Swiss crypto specialist DSENT AG (subsidiary of inacta AG) operates the renowned ICO portal tokengate.io. The portal of the Swiss-based Crypto-Valley company in Zug is based on the motto “Connecting people and tokens - enabling token economies”.

Since the 21st of January of 2019 THE STONE COIN (STO) is available on the portal tokengate.io (thestonecoin.tokengate.io). Interested parties can there purchase THE STONE COIN for a minimum amount of CHF 100 in a reputable and secure environment.

Only a light AML/KYC process is required for purchases up to CHF 1,000. The portal can be accessed directly at [thestonecoin.tokengate.io](http://thestonecoin.tokengate.io) or through the link on the THE STONE COIN webpage [www.thestonecoin.com](http://www.thestonecoin.com).

**tokengate.io**

Interested parties who wish to purchase quantities of 10,000 STO (THE STONE COIN) or more can get them directly from Michael Reinhold at [m.reinhold@thestonecoin.com](mailto:m.reinhold@thestonecoin.com).

## THE STONE COIN (STO) has been added to Crypto-ATMs

THE STONE COIN (STO) has been added to Crypto-ATMs in Austria on April the 1st. As the first ATM operator, the Austrian company Coinway has launched the THE STONE COIN (STO) in addition to Bitcoin on all its ATMs in Austria. Tokens can be purchased at the Coinway machines. Coinway CEO Björn Völkl has announced a rapid expansion of the nationwide ATM network.

THE STONE COIN will soon be available at ATMs throughout Switzerland and in South America, as well. For example, the Swiss company Be Real World AG is planning to install around 100 ATMs in Switzerland in the course of 2019, where THE STONE COIN (STO) will then be available as well as Bitcoin and Ethereum.

## THE STONE COIN trading starts at LATOKEN

The launch of the trading of THE STONE COIN (STO) is imminent. The payment token THE STONE COIN will be traded in 2019 on a fine selection of TOP 30 exchanges. Trading starts on July 22nd of 2019 at the crypto exchange LATOKEN. LATOKEN is one

of the top 30 international crypto exchanges with an adjusted 24-hour trading volume of over € 272 million, according to CoinMarketCap. LATOKEN has announced: "We are happy to announce that THE STONE COIN will be listed on LATOKEN on July 22nd!".
