

Press release 2/2019

## **THE STONE COIN goes public**

### **Trading of THE STONE COIN will start on July the 22<sup>nd</sup> of 2019 at the crypto exchange LATOKEN**

Vaduz/Zug, February 4, 2019 – The trading of THE STONE COIN will start in the middle of 2019. In the meantime, THE STONE COIN AG was able to coordinate the listing at four well-respected crypto exchanges for 2019. The start of the listing and trading will take place one by one in two months intervals, starting with LATOKEN on July the 22<sup>nd</sup> of this year.

LATOKEN is a rapidly growing crypto exchange focusing on providing liquidity supply for new utility and security tokens. The daily trading volume amounts to around \$ 100 Million. At present there are already more than 120.000 registered traders on LATOKEN.

THE STONE COIN will concentrate the trading in 2019 on a manageable number of exchanges as a precondition for a sound price formation. The activation of additional crypto exchanges will be carried out in 2020 when it is justified by the international trading volume.

### **About THE STONE COIN**

The basic concept of THE STONE COIN is the combination of the flexibility of a crypto currency with the security of a European real estate portfolio. The net revenue generated from the issuing of the token will be completely invested in the development and permanent operation of a European real estate portfolio.

THE STONE COIN is not tangibly backed up by real estate, but provided with a REAL SHIELD that shall ensure the permanent operation of the system and the network of acceptance points. THE STONE COIN is thus the first payment token in the DACH region (Germany, Austria, Switzerland) with a real estate based REAL SHIELD.

THE STONE COIN brings the crypto currency to the Point of Sales (PoS). Currently a European network of acceptance points for THE STONE COIN as a payment token is being built up in cooperation with specialised service providers. This makes it easy and convenient to pay by mobile app with THE STONE COIN.

Only after the successful consultation with the responsible financial market authority (FMA) and the unrestricted qualification of the THE STONE COIN as a payment token not requiring authorization was it brought onto the market. THE STONE COIN is thus neither a security token nor an asset (backed) token. Inasmuch the token can be issued, traded and used as a payment method without any special restrictions.

THE STONE COIN is a blockchain based ERC20-payment token.
